TOOLS

■ Visual Studio

■ Rider

■ Git

■ Perforce

■ Trello

Hi, I'm Marc, I love developing video games, and my current specialization is gameplay programmer given all the experience I have gained throughout the academic projects in which I have been part. I have experience in group work as well as working alone. Over time I have proven to myself that I can face any problem. I can't wait to learn more and be a part of this industry that I love so much.

PROJECTS

AI Programmer Oct 2023 - Jul 2024
Happy Mochi Studio, Valencia, Spain

Using Unreal 5.2
In this project, I was in charge of the AI of all the enemies. The group was made up of 17 members divided into 7 programmers, 8 artists and 2 designers. Some of my contributions were the creation of the base that would be used on all enemies as well as 5 different enemies and a final Boss.

Engine Programmer Oct 2023 - May 2024
KM Engine, Valencia Spain

Using OpenGL
In this project, together with a classmate, we created a graphics engine from scratch using OpenGL. This engine has features such as ECS, multithreading, dynamic lights and shadows, physics implementation, and a fly camera.

Game Developer Mar 2023 - May 2023
Valencia, Spain

Using Unity
In this project together with a classmate was my first experience creating a small game for VR. I implemented the VR foundation in Unity using external plug-ins in addition to some basic game mechanics.

EDUCATION

Games Technology MSci/BSc Sep 2024 - Present
Coventry University, Coventry, UK

This course will help me lay the foundations of academic knowledge as well as my future personal thesis which will help me in my development as a programmer and professional. In addition to this, this course provides me with a basis in different fields in the development of a video game such as the process of creating art and design. This will help me communicate with the other departments in the future.

The BTEC Level 5 Higher National Diploma in Computing (RQF) Oct 2021 - Jun 2024
ESAT, Valencia, Spain

These studies are the foundation of my programming knowledge. Here, I have cultivated all my interest and love for video game development. In this HND, I have learned languages such as C/C++, C#, Assembler, HTML, and CSS, as well as a great deal of optimizing code. Thanks to the projects carried out throughout the course, I have been able to determine the branch of programming in which I want to specialize.
